

Assessment Onboarding Notice: SteelMint launches Cast Iron scrap assessment DAP Coimbatore

Indian ferrous scrap consumption is at 22-25 million tonnes (mnt) in steel making, in which Cast Iron scrap comprises approximately 6-7 million tonnes. It is generated from machinery and equipment such as cranes, fans, motors, appliances, pumps, conveyor equipment, etc.

In Tamil Nadu the major foundry clusters are located in Coimbatore

In an intent to widen our scrap coverage and feedback from market, we have selected Coimbatore as assessment location.

Source: Traders based in Coimbatore-Tamil Nadu

Material Descriptions:

Clean and heavy machinery parts, automobile or truck motors etc. which is free of nonferrous and non-metallic parts. All pieces must be of cupola furnace size.

Yield: 95 to 97%

Assessment	Grade	Origin	Region	State	Size	Chemical Composition	Delivery Terms
Melting Scrap, DAP-Coimbatore, India	CI Scrap	Ex- Coimbatore	South India	Tamil Nadu	Mixed thickness	Recovery 95-97%	DAP
