## Pricing Notice: BigMint enhances rebar steel coverage with new Nepal rebar price assessments

We are pleased to announce the introduction of our new pricing assessments of Nepal Rebar Long steel price assessments.

Nepal's rebar market primarily caters to the domestic construction sector. The primary regions for rebar demand include East (Birgunj, Siddharthnagar) and West (Nepalgunj, Bharawa) Nepal. To supplement domestic production, rebar manufacturers often import raw materials like scrap (globally sourced), sponge iron, and billets (primarily from India).

The rebar market in Nepal produces approximately 60,000 to 80,000 tonnes of rebar monthly. The product specifications typically include a physical composition of 8-32mm, manufactured through the IF Route. The chemical composition adheres to the Fe500 grade, with C:0.25, S: 0.040, and P: 0.045. Rebar is usually sold on an EXW basis, with payments due within 5 days. Deliveries are expected within a week of purchase.

This expansion is part of our ongoing commitment to providing comprehensive and accurate market insights, catering to the diverse needs of our stakeholders in the finished long steel industry.

### Assessment details:

<b>Product: Rebar</b>	<b>Delivery period: Within 5 days</b>
<b>Grade: Fe500</b>	<b>Delivery Terms: EXW</b>
<b>Size: 8-32mm, IF Route</b>	<b>Publication day/time: Saturdays at 13:00 IST</b>
<b>Benchmark City: Birgunj</b>	<b>Currency: NPR/t (t)</b>

BigMint will continue to monitor changes in the domestic markets and will keep updating its methodology and assessments. To provide feedback on this price or if you would like to contribute by becoming a data partner, please contact – [info@bigmint.co](mailto:info@bigmint.co).
