

Pricing Notice: SteelMint launches assessment for Indian iron ore concentrates

- ✓ Madhya Pradesh, the fifth-largest iron ore producing state in India, produces around 2.5-3 mn t pa of iron ore (lumps and fines) annually. About 96-98% of total production is below Fe 55% grade, which is beneficiated and used by pellet producers as well as for sintering.
- ✓ About 1.50 mn t pa iron ore concentrates are produced annually in Madhya Pradesh.
- ✓ Thus, in line with the feedback received on refining its concentrate coverage, SteelMint has decided to launch this assessment.

The details of the assessment are as follows:

- Commodity: Concentrates
- Size: -45 micron
- Grade: Fe 63%
- Origin: India (Jabalpur region)
- Unit: INR/t
- Frequency: Weekly
- Publication: Wednesday (by 18:00 IST)
