

New Pricing Notice: ADC12 Ingot and Tense Scrap Price Assessment for Chennai

We are pleased to announce the launch of our new pricing assessments for ADC12 ingot and Tense scrap material specifically for the Chennai region. Recognized as the “Detroit of India,” Chennai is a major hub for the automobile industry, hosting manufacturing plants for several leading global and domestic automotive companies. The region’s thriving automobile sector heavily relies on the ADC12 aluminium alloy, known for its excellent castability, high strength, and superior corrosion resistance. ADC12 is predominantly used in the production of engine parts, transmission cases, and other critical components. Chennai is home to over 30 automobile manufacturers, including giants like Hyundai, Ford, and BMW, as well as more than 150 die-casting companies that supply essential components.

In response to client feedback on the need for spot prices of ADC12 ingot and Tense scrap material from the Chennai region, BigMint has introduced the following price assessments:

Assessment details:

Aluminium Ingot ADC12

Origin: Exw Chennai
