Pricing Notice: BigMint Launches Low carbon (LC) Ferro Chrome Price Assessment of India

In the light of feedback received from our subscribers on extending its international coverage, BigMint has decided to launch Low carbon (LC) Ferro chrome price assessment of India.

According to research by BigMint, the current monthly production of low carbon ferrochrome in India is approximately 5000 tons per month through the furnace route. Additionally, an estimated 2000-3000 tons per month is produced through the Alumina Thermit process. Therefore, India's total monthly production of low carbon ferrochrome stands at roughly 8700 tons per month. This accounts for approximately 7-10% of India's total ferrochrome production.

Assessment details:

Size: 10-60 mm,
Chemical Composition - Cr: 60%, Si: 1.50%
Max, C: 0.1% Max, P: 0.04% Max, S: 0.03% Max
Delivery Terms - Ex-works
Taxes – Excluding
Min. order quantity – 25t

Payment Terms- Advance
Assessment – Weekly
Publication day/time - Thursday at
10:30 am
Currency – INR
City – Durgapur

BigMint will continue to monitor changes in the domestic markets and will keep updating its methodology and assessments. To provide feedback on this price or if you would like to contribute by becoming a data partner, please contact – info@steelmint.com
