New Pricing Notice: Stainless steel imported scrap assessment (Nearshore, CFR Mundra)

Greetings from BigMint!

We are pleased to announce the introduction of our new pricing assessments for imported stainless steel scrap grades 201 and 430, sourced from the Nearshore region to CFR Mundra. India imports around 130-140k tonnes of 430-grade scrap and 80-90k tonnes of 201-grade scrap annually, primarily from countries such as South Korea, Vietnam, Thailand, Indonesia, and the Middle East. These materials are vital for producing 200 and 400 series stainless steel in India, making accurate price benchmarking essential.

Based on client feedback requesting price assessments for 201 and 430-grade stainless steel scrap, BigMint has now launched the following assessments:
